SATURDAY EVENING, OCTOBER 19.

The Rinderpest.

Inspector Robinson, who was detailed by the Health Officer to make a special investigation of the rinderpest which was said to be prevalent in the county near Good Hope Hill, reported the result of his observations this morning. He said he found two cows with lung fever at Major Cabell's place, on the Good Hope road. The fever first made its appearance in that section last winter and there were some dairymen who lost as many as 25 cows by it. He is of the opinion that as soon as the cattle are brought in from the pastures and stabled it will again make its appearance. The first sign of the fever is shown in the quality of the milk, which becomes blue and watery; the animal then begins to lose flesh very rapidly and its milk dries up entirely; then follows a high fever, as is shown from the ears and a copious discharge of matter from the nose, difficulty in breathing and loss of appetite. Although the animal may have it in its system for some two months, it is not known until shown by the character of the milk two weeks before the disease takes its worst form. — *Washington Critic.*

A young fellow in San Francisco suddenly snatched a kiss from a lady friend, and excused himself by saying that it was a sort of temporary insanity that now and then came upon him. When he arose to take his leave the plying damsel said to him: "If you ever feel any more such fits coming on, you had better come right here, where your infirmity is known, and we will take care of you."

At Dealham's all goods are warranted as represented. S. Dealham, 62 King street, has the finest clothing in the city.
